Preset Learning Paths

Maverick provides preset learning path options with your subscription to ENGAGE Learn. These learning paths have been designed for project team audiences using Maverick's standard content, to provide them with the early awareness they need to successfully contribute to various implementation initiatives.

There are 3 preset learning path tracks that grow progressively more complex and comprehensive:

Tester, Designer, and Certification. In most cases, users should not be assigned to take learning paths for the same Oracle application in multiple tracks. Below, find more information about the audience and available learning paths for each of these tracks.

Tester Track

This learning path track is designed for project team members who will be involved in testing. The objective for the learning paths included with this track is to provide initial exposure and familiarity with core functionalities.

The Tester learning path track is ideal for users who:
- Are first-time Oracle users
- Need to gain familiarity with basic navigation and key functional tasks
- May be responsible for performing key business functions post go-live (core users)

Designer Track

This learning path track is designed for project team members who will be involved in system design. The objective for the learning paths included with this track is to enable users to make informed decisions when it comes to key components of system design.

The Designer learning path track is ideal for users who:
- Are more experienced with Oracle but may be new to specific Cloud applications
- Need to understand (but not necessarily perform) system configuration options
- May be responsible for system administration post go-live (config or admin users)

Certification Track

This track is designed for implementers who need to know how to configure Oracle applications. The objective for this track is to enable implementation resources who will actually be performing configuration tasks. These learning paths were designed around the implementation certification objectives set by Oracle.

The Certification learning path track is ideal for users who:
- Are very experienced with Oracle Cloud
- Are training to achieve their professional Oracle certification

Tester Track

Tester Learning Paths:

Enterprise Performance Management
- Account Reconciliation
- Data Management
- Financial Consolidation and Close
- Planning

Enterprise Resource Planning
- Advanced Collections
- Cash Management
- Credit Management
- Expenses
- Financial Reporting
- Fixed Assets
- General Ledger
- Payables
- Project Financial Management
- Project Management
- Receivables
- Revenue Management
- Risk Management

Human Capital Management
- Absence Management
- Benefits
- Compensation
- Global Human Resources
- Payroll
- Recruiting
- Talent
- Time and Labor

Procurement
- Procurement

Supply Chain Management
- Cost Management
- Global Order Promising
- Inventory
- Manufacturing
- Order Management
- Planning Central
- Pricing
- Product Hub
- Sales and Operations Planning

Designer Track

Designer Learning Paths:

Enterprise Performance Management
- Account Reconciliation
- Data Management
- Financial Consolidation and Close
- Planning

Enterprise Resource Planning
- Accounting Hub
- Advanced Collections
- Cash Management
- Credit Management
- Expenses
- Financial Reporting
- Fixed Assets
- General Ledger
- Payables
- Project Financial Management
- Project Management
- Receivables
- Revenue Management
- Risk Management
- Tax

Human Capital Management
- Absence Management
- Benefits
- Compensation
- Global Human Resources
- Payroll
- Recruiting
- Talent
- Time and Labor

Procurement
- Procurement

Supply Chain Management
- Cost Management
- Global Order Promising
- Inventory
- Manufacturing
- Order Management
- Planning Central
- Pricing
- Product Hub
- Sales and Operations Planning

Certification Track

Certification Learning Paths:

Enterprise Performance Management
- Account Reconciliation Implementation Essentials
- Financial Consolidation and Close Implementation Essentials
- Planning Implementation Essentials
- Enterprise Data Management Implementation Essentials

Enterprise Resource Planning
- Accounting Hub Implementation Essentials
- General Ledger Implementation Essentials
- Payables Implementation Essentials
- Project Portfolio Management Implementation Essentials
- Receivables Implementation Essentials
- Revenue Management Implementation Essentials
- Risk Management Implementation Essentials

Human Capital Management
- Absence Management Implementation Essentials
- Benefits Implementation Essentials
- Global Human Resources Implementation Essentials
- Payroll Implementation Essentials
- Recruiting Implementation Essentials
- Time and Labor Implementation Essentials
- Workforce Compensation Implementation Essentials

Procurement
- Procurement Implementation Essentials

Supply Chain Management
- Cost Management Implementation Essentials
- Inventory Implementation Essentials
- Manufacturing Implementation Essentials
- Order Management Implementation Essentials
- Planning and Collaboration Implementation Essentials
- Product Lifecycle Management Implementation Essentials
