# ENGAGE | Learn

**ENGAGE Learn** is a subscription-based, on-demand training platform. Our custom training subscription always matches your software, so that your users are always kept up to date with the changes in the system.

## OUR TRAINING WORKS WITH:

ORACLE    workday.    salesforce    SAP    Dynamics 365

**Sustainable, Interactive,** and **Customizable** training content built for:

✓ **Project Team**

✓ **Functional End Users**

✓ **Self-Service users**

## Fully Customizable
We can customize your training to match the look and feel of your own Cloud environment and capture your organization's unique business processes and work flows to enhance user adoption.

## Effective
We offer training for all learning styles. We offer a large amount of searchable and customizable content, self-paced simulations, quick reference guides, and job aids across all the applications.
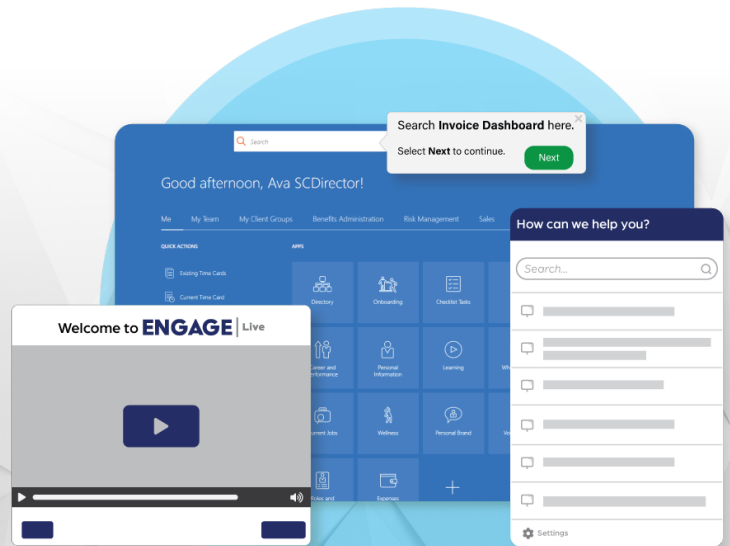

## Agile
Subscribers of ENGAGE Learn receive content updates at no additional cost.

# ENGAGE | Live

**ENGAGE Live** is an in-app performance support tool that guides and assists your users inside your enterprise applications in real time. **GUIDE**, **INFORM**, and **ALERT** your users, all within the Cloud application.

## OUR TRAINING WORKS WITH:

ORACLE · workday · salesforce · SAP · Dynamics 365

**ENGAGE Live** offers customizable and real-time guidance within the application. We create and update in-app guidance as Cloud applications evolve and as your business processes change.

Quickly embed welcome videos, system update notifications, and announcements in your enterprise applications.

## Communication Tool
Communicate to your workforce within the flow of work with custom messages and videos embedded in your environment.

## Real-Time Assistance
Contextual in-app guidance appears in real time based on user needs—just like a GPS, but for your Cloud apps.

## Insights and Analytics
Access usage reports and insights to see where users are running into issues and how they are using the software.
